Summary of Research Topic (a paragraph, not a full research proposal):

How is the research funded?

What do you expect the Citizen Scientist volunteers to do?

Where is the field site? (can be anywhere in the world)

What else is in the immediate area for the Citizen Scientists to do when they are not working on your project?

What dates do you propose? (most trips are Monday to Friday, with volunteers arriving the Sunday before and leaving Friday afternoon). Multiple dates and back-to-back trips can be accommodated.

How many volunteers would be ideal (minimum is 4)? **Is there a maximum?**

Will there be a field team at that location during the proposed trip?
